Technical Stack

Frontend libraries

For complete list, see [bower.json](#)

- [AngularJS] - MVC framework for data-binding, front-end routing, and awesomeness
- [UI-router] - Client side URL routing
- [UI-Bootstrap] - UI boilerplate framework built on top of AngularJS

Frontend development/build tools

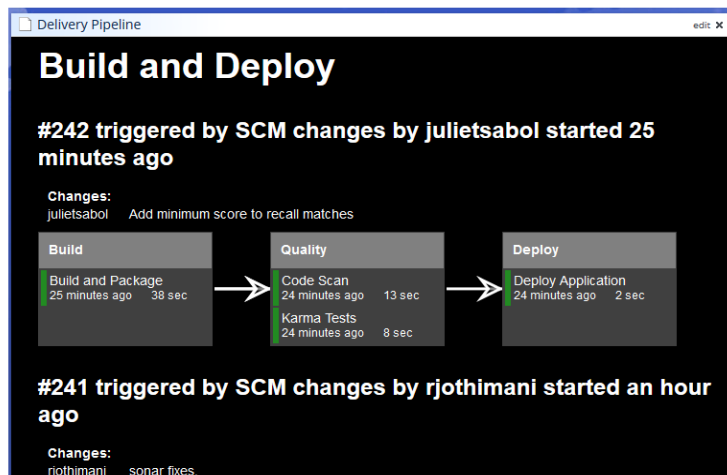

For complete list, see [package.json](#)

- [Less] - CSS preprocessor
- [Karma] - JavaScript unit testing
- [Yeoman] - Scaffolding tool that includes Grunt.js and Bower.js - requires Node.js installed
- [Grunt.js] - Code automation tool
- [Bower.js] - front-end component repository
- [Node.js] - build environment
- [SublimeText3] - awesome text-editor

Server, Database, Continuous Integration

- [LAMP / WAMP] - Linux/Windows / Apache / MySQL /PHP - Service layer and data persistence layer
- [Jenkins] – build automation tool
- [Sonar] – code scanning tool
- [Apache] – application server
- [MySQL] – open source database
- [GitHub] – code repository

Jenkins build and deploy output

Sonar output
